Education

Columbia University

May 2025

Bachelor of Arts in Information Science (focus: Computational Linguistics)

New York, NY

Relevant Coursework

- Data Structures
- Data: Past, Present, Future
- Database Management
- NLP
- AI and NLU
- Computational Text Analysis
- Advanced Programming
- Clean Object-Oriented Design

Experience

Outlier.ai

April 2024 – May 2025

AI Writing Evaluator (Contractor Role)

New York, NY

- Rate outputs of AI models according to official criteria and annotate errors for improvement in subsequent training.
- Learn about the core practices in data refinement for LLMs and the RLHF process.
- Cross-review other contractors' responses in order to ensure the highest data quality for vendors.

Stealth Startup

July 2023 – November 2023

Intern – Data Science

London, UK

- Created a document processing pipeline to transform key financial texts to refine ML models for document labeling.
- Structured backend data using SQL in AWS and developed Python scripts for validation and statistical analysis.
- Researched current methods in AI-enhanced processing of financial text data, particularly RAG architectures.

Columbia Daily Spectator

January 2020 – May 2023

Section Lead – Product Design

New York, NY

- Collaborated with 12 designers and 16 developers to create revenue-generating products focused on university life.
- Designed prototypes for custom web pages, digital issues, and feature digital-first news products using Figma.
- Products received 350,000+ annual unique page views, generating high five-figure revenue.

Columbia University Health Language Lab

November 2021 – May 2023

Research Assistant

New York, NY

- Participated in 50+ lab meetings with tenured faculty and various stakeholders to plan CDC-funded research.
- Developed visualizations and presented findings on discourse changes during COVID-19.
- Compiled corpus of 100,000+ scraped posts and ran analyses using NLP to assess public sentiment toward vaccinations.

Laidlaw Foundation

May 2020 – September 2021

Research Fellow

New York, NY

- Conducted groundwork historical research on German political parties with tenure-track faculty member.
- Executed textual analysis on party documents via Manifesto Project and on pulled Tweets with Python and Neo4J.
- Documented project and visualizations and presented findings at an undergraduate research fair.

Columbia University German Department

October 2020 – December 2020

Research Assistant

Remote

- Created and managed an online outlet for student work during remote semesters.
- Developed the website with a database of 60+ stories including a tag and filter system.

Technical Skills

Languages: C, C++, Python, Bash, Java, R, JavaScript, HTML5/CSS, SQL

Tools: Git, Docker, MongoDB, MySQL, Google Cloud

Concepts: NLP, UI/UX, Machine Learning, Exploratory Data Analysis, Data Visualization

Awards and Fellowships

Data Science Institute – Data for Good Fellowship

Laidlaw Foundation – Research Fellowship

Deutsches Haus Senior Departmental Prize
